

2005 MOUNTAIN CYCLE SAN ANDREAS DNA RECEIVES HIGH PRAISE

Marzocchi USA Vice President Bryson Martin gives his opinion of the new San Andreas DNA.

“I have been riding the DNA and at first I felt the bike was great, now I feel it is awesome, no lie, no embellishment, no joke.

I have a serious stable of rides that I test suspension on, and hands down, it is one of the best rides I have in the All

Mountain category.

It also climbs very well with minimal pedal feedback normally associated with single pivot designs.

Finally, after spending some time setting up the rear shock (progressive) the bike’s handling with the Marzocchi All Mountain 1 (with 150mm of travel) handled like a DH bike, it’s a ripper”
